

Environmental Policy

Intent

The Assetlink Group (“Assetlink”) incorporating Assetlink Services Pty Limited and AssetFuture Pty Limited, Environmental Policy describes Assetlink’s commitment to conducting its business in a sustainable way with a minimum negative impact on the environment.

Principles

To achieve this policy Assetlink is committed to the prevention of pollution and will at all times have in place waste containment and minimisation processes.

Assetlink will strive for continual improvement of its environmental performance through systematic monitoring and measurement of its environmental sustainability program against ISO14001 and customers’ needs.

RACI

Responsible	Implementation of this policy is the responsibility of all Assetlink team members. Responsibility for the maintenance and communication of this policy is shared by the Operations Management and People & Culture teams.
Accountable	The final authority for this policy lies with the Managing Director.
Consulted	When making changes to this policy consultation should be carried out with all team members and relevant contractors.
Informed	All changes to this policy should be communicated to all team members and relevant contractors.

Operation and Incidence

Commitment and Communication

Assetlink is committed to:

- Compliance with local, State and Federal environmental legislation/regulation and other supporting guidelines and codes of practice as necessary to meet its own stated objectives, contractual obligations and those of regulatory bodies
- Setting annually and periodically reviewing environmental objectives and targets
- Putting in place waste and energy minimisation processes with proper waste handling and containment strategies as a key objective for operations
- Planning the purchasing of new plant, equipment and hazardous substances with consideration for environmental performance capabilities
- Maintaining an environmental reporting system to allow management to be informed of important environmental developments, particularly environmental incidents
- Taking into account community concerns on environmental issues.

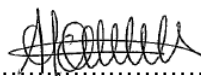

Objectives and Targets

- Minimise water usage in the workplace, wherever possible.
- Minimise electrical power usage in the workplace.
- Re-use cleaning cloths by collecting cloths previously used in food service areas and re-using them on industrial sites for other less critical cleaning processes.
- Collect paper, cardboard, plastic and glass waste for recycling purposes.
- Purchase chemicals that are biodegradable and/or low toxicity and encourage our suppliers to provide chemicals only in re-usable containers.
